

Just thought I would agree with the union ad that postal deregulation, in urban areas, is a bad idea. I am unhappy enough that many areas in the city no longer get house delivery of mail, and that "super mailboxes" are the way to go in new housing areas : that already creates a two tier system. Super Mailboxes should be done away with.and daily OR EVERY OTHER DAY delivery should be made, to each house/apt unit, if that is what it takes to be more cost efficient.
