**July 15, 2008**

**Canada Post Corporation Strategic Review  
330 Sparks Street (HCCR)  
Ottawa, Ontario  
K1A 0N5**

**In regards to the Government doing a review of Canada Post Corporation.**

**If the Government is planning to implement changes (deregulation) of the services provided by Canada Post – public consultation meetings should be held.**

**We live in a small rural community in Saskatchewan. Some people have to drive up to 30 miles or more to get their mail. This is not done on a daily basis but on a need to “go to town” for other things – school activities, groceries or parts. The people in rural areas are not asking for an increase in services but to maintain what they currently have.**

**It is imperative to maintain postal service within our community. Many people in rural Saskatchewan do not have access to high speed internet; therefore, the idea that Government agencies should send their information out by e-mail is not a viable option. Some of the information that our ratepayers require must be in hard copy format, therefore mail is the only option we have to provide this to them.**

**Respectfully,**

---

**Rita Dumonceau  
Administration Assistant**
