

Canada Post Corporation Strategic Review
330 Sparks Street (HCCR)
Ottawa, Ontario
K1A 0N5

To Whom It May Concern
BECAUSE IT CONCERNS ALL CANADIANS

Please do NOT privatize Canada Post.

In a country that has worked hard to build communications across the distances,
in a nation that builds relationships with other countries through letters and magazines
that come and go across boundaries,
in a world that needs secure and affordable postal systems,
Canada has had the good services of Canada Post
to assist with those objectives.

As a citizen in a small community, the Post Office
is a point of community as well as a postal service.

One national service with regulations that assure all citizens
that their most important documents are secure and will be delivered as promised
contributes to a strong and healthy economy and citizenship in a country to be proud of.

Deregulating could undermine these important Canadian values.

Think about it.
